

#### ANNEX 2.4 Brainstorming in small groups on how to protect your participants and yourself from attacks via IT-tools – STEP 5

- Protect your mobile phone (password, fingerprint...)
- Loss of mobile has to be reported to the police (data theft)
- Use the possibility to delete data from a distance
- Some social media have the permission to save your data and give your photos etc. to others. If possible, change from WhatsApp, Facebook to for example Signal because there is more protection for your data.
- Use the setting private
- Knowledge about the laws concerning social tools
- Don't use the memory function for passwords
- Ignore emails where the content is a prize draw
- Don't open emails sent by unknown people
- Use a firewall
